

# Public Safety 2-Way Radio Signal Booster Repeaters Discovery Document

---

1. What is driving you to look at a public safety solution?
2. Are you planning or currently in construction on a new building?
3. Have you been contacted by the local fire department regarding any signal enhancement requirements for that building?

4. Has any testing been done by the local municipality to determine pass/fail for public safety radios?
5. Do you have bid documentation for the project which states an NFPA compliant radio repeater is required?
6. Are there any additional issues, concerns or comments for this quote we should know?
